

SAYNPS Webinar

22 July 2020

“The Role of the Youth in the Nuclear Energy Programme”.

SAYNPS Webinar takes place in a time when the country is facing Covid-19 pandemic

South African nuclear employees have been identified as among the key workers that are essential to maintaining important infrastructure both in Koeberg Power Station and Necsca

There has been no reports of **enforced shutdown** of a nuclear power reactor due to the effects of **COVID-19** on the workforce or supply chains

Operations have continued ensuring **safety and security** at Koeberg and Necsca even as the pandemic has impacted them in various ways

Since the imposition of national lockdown in late March, NTP had been able to dispatch more than **120 shipments of medical radioisotopes** to customers around the world
