

SAYNPS Webinar

22 July 2020

“The Role of the Youth in the Nuclear Energy Programme”.

Department developed the Youth Strategy for the energy sector to address young people challenges

Youth strategy recommends that Infrastructure development, maintenance and energy diversification are necessary to **boost job creation**

Access to funding and market, and removing barriers of entry to the sector will be key to **advance entrepreneurship and access to business opportunities**

The energy sector needs **skills such as engineers, project managers, researchers, innovators, nuclear technologist and scientists** to increase economic growth

The strategy recommends the establishment of the **Energy Sector Youth Council (ESYC)**, which will be a youth representative structure

**mineral resources
& energy**
